American English Accent Training at the USLHC

Accent Training

Individual accent training is available at the USLHC. These services are provided by graduate students in the Department of Communication Sciences and Disorders, under the supervision of a licensed and certified speech-language pathologist.

The Focus of Accent Training

- Develop effective speaking strategies to be understood in self-selected communicative contexts
- Learn to codeswitch depending on the communication partner or audience
- Learn pronunciation of General American English (GAE) consonants and vowels
- Produce speech using rate, rhythm, and intonation that is consistent with GAE patterns
- Improve overall communication skills and speak with confidence in chosen contexts

What is Accent Training?

The goal of accent training is to examine the differences between individual native dialects and General American English (GAE). Individuals who elect to participate in accent training will receive explicit instruction and specific feedback regarding their speech patterns and GAE. In chosen contexts, strategies to enhance pronunciation of GAE will be shared and practiced. A structured home practice program will be created together to ensure carryover of skills.

For more information about accent training, visit:

https://www.asha.org and search accent modification

The Benefits of Accent Training

Participation in accent training increases communication effectiveness in some contexts. Rather than the listener attending to the accent, listeners will attend to the message.

Codeswitching between individual native dialects and General American English (GAE) in chosen contexts may result in increased confidence in professional and social situations.

Individuals will learn to produce speech sounds and patterns consistent with GAE using proven techniques and strategies. As a result, individuals will produce speech that is better understood by others in self-selected communicative contexts.

SEEK FIND

Registration Required

Call 713-743-0915 to register or email Michele Ozgen at <u>uslhc@uh.edu</u>. Laura Cizek, Clinical Associate Professor, can be reached via email at <u>lscizek@Central.uh.edu</u>.

Fees

- · Sliding scale based on income
- Discounts available for UH faculty, staff, and students

Schedule

Varies — Approximately 12 weeks in the fall and spring semesters

Who is Eligible?

Adults who wish to learn the differences between their individual native dialect and General American English (GAE).
