Abstract

A 250 word abstract goes here. It should be left and right justified as this paragraph is. Note that the title is all caps and 14pt Times New Roman, and the rest of the text is in 12 pt Times New Roman. The box is 4inch wide by 3 inch high and centered. Leave exactly one line between the various items in the box as shown. The list of Keywords is 1 inch below the box and centered. The dept. logo is centered and stops immediately after the word Science (this is the only difference with the dept. webpage). If there are authors with affiliations other than UH, their addresses should go in the footnotes only and not in the box. If sponsors need to be thanked, they should be thanked only in the footnotes on this page or as an Acknowledgement paragraph just before the references. Multiple authors should be separated by commas and an and before the last author. Please do not use spaces to separate authors. This page should not be numbered. The rest of the technical report should be format exactly as a *journal* paper in single-space, one-column format with 11pt font.

¹ Thanks to DEF and XYZ Foundations go here.

² Author 3's address goes here.
